Jon,

In order to clear up any potential confusion regarding the FS Work Plan, I have confirmed that this was included as Section 4.9 of the document titled "Final Work Plan, Remedial Investigation and Feasibility Study for the LCP Chemicals, Inc. Superfund Site", (URS, October 2006) as was provided to you by Paul Thorn in the transmittal last week. A copy of the (very brief) FS Work Plan has been excerpted and attached from the referenced document.

Please contact us with any further questions or comments regarding these documents.

Scott MacMillin, P.G., LSRP

Subject: Documents

John and Carrie, can you send me electronic copies of all approved workplans for the FS and the RI (including risk assessments).

Our file room needs to put them in the Admin Record. I'll send the file room the final HHRA and the Tech Memo.

If I can approve the RI/FS and BERA next week, we'll probably squeak by. Oh, we're shooting for 8/28 for a public meeting.

jon

ps, please send them to me and Rob Keating cc'd above.

4.9 TASK IX – DRAFT FEASIBILITY STUDY REPORT

A Draft Feasibility Study Report will be prepared using EPA Guidance (1988) and submitted for EPA review and approval. The activities that were conducted during the feasibility study will be documented in this report. At a minimum, the following key elements will be presented in the report:

- Identification of Applicable Relevant and Appropriate Requirements;
- Remedial Technology Screening;
- Development of Remedial Alternatives;
- Detailed Analyses of Remedial Alternatives; and
- Selection of Preferred Alternative.

This document will be used as a basis for the final remedy selection by the EPA. The results of the Feasibility Study will be verbally presented to the EPA and NJDEP for discussion. A final report will be revised, as required based on oral and written comments, and submitted to the EPA.
